WORK WITH US   CREATIVE   ENGINEERING   BUSINESS   INTERNSHIPS

Javascript Engineer Intern (Fall)

Frontend Development | Gainesville, FL, United States

Seeking a hard-working, problem solving individual who is interested in working on the Grooveshark web application, mobile website, or a range of other projects. This intern will gain invaluable experience while working with other developer mentors to create new features and improve upon existing features. The ideal candidate will have a foundation of writing functional Javascript, HTML, CSS with clean, standards compliant code.

At Grooveshark, we believe everyone should have access to the music they love. You will be joining a dedicated, energetic team of people who are looking to change the face of the music industry and who wholeheartedly support open music. We want passionate individuals who believe in our mission and who will contribute new and creative solutions to our cause.

Here's what you can expect from your internship:

- Improve your Javascript, HTML & CSS understanding and skills
- Troubleshooting Javascript, HTML & CSS for all major browsers
- Become awesome at Git
- Write Javascript to create shiny new features that people love
- Work closely with and learn from a team of ridiculously smart, experienced developers of every type
- Internship lasts 90 days, unpaid

THE PERSON:

- Foundation in Javascript, HTML & CSS, preferably in large web applications
- The ability to write clean, self-documenting code
- High attention to detail
- Adherence to coding standards
- Experience with Git, Subversion or other version control systems
- Experience dealing with browser compatibility issues

BONUS POINTS:

- Experience with popular libraries such as jQuery and backbone
- Down to work into the wee hours of the night
- Love for music

THE PERKS:

- An open-plan office, encouraging exposure to different teams at Grooveshark.
- Access to the Sound Bites cafe, where you can eat free!
- Free or discounted social events, shows
- Flexible hours
- Access to almost every video game console ever created
- Access to our jam room (Play any instruments? You'll probably find them in here)
